

Finishing accessories

Finishing accessories fulfill the 3 fonctions of protection, hygiene and attractiveness by their design in terms of shape and materials.

Coving sections

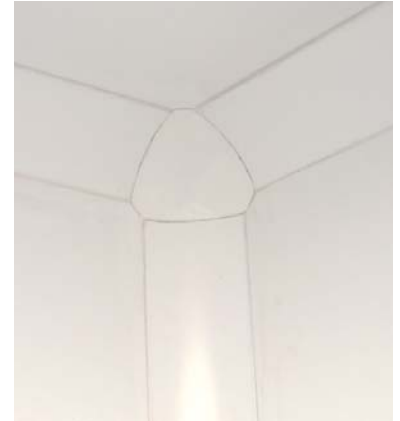

PVC coving section is designed for cladding of partition-to-partition and partition-to-ceiling angle.

Its rounded shape (radius 45 mm) facilitates the cleaning according to the hygiene rules.

It is made up of a flexible PVC profile clipped onto an angle iron fixed by screws or rivets.
Tightness by mastic under support.

Colours available :

- in standard : iceberg white (similar RAL 9010)
- on request : pebble white (similar RAL 9002), sulphur yellow (similar RAL 1018), horizon blue (similar RAL 5015), canyon red (similar RAL 3013), meadow green (similar RAL 6018).

A ceiling-rose assures a perfect finish of the ceiling angles.

Skirting boards

Finish element, the PVC skirting board protects the bottom of partitions in enclosures where activity is not excessive.

Its shape and its invisible fixing make it corresponding to the current hygiene rules (PV AFSSA).

Lips in flexible PVC in high and low part (radius 15 mm on the floor)

Extremity tips stuck. Pieces of rounded salient and re-entrant angles in continuity with the sanitary coving section of the vertical angle.

Complementary airtightness under flexible lips by mastic.

Dimensions

Height : 110 mm

Length : 2400 mm

Thickness : 9 mm

Colours

Black (RAL 9004)

These skirting is not designed to resist to the mechanical shocks whatever nature it is.
The quality of airtightness in bottom of Wall highly depends on the flatness and the nature of the floor.

Handrail

Handrail is designed to protect the panel faces in areas where the traffic is intense like delivery or traffic corridors...

By its thickness, this handrail pushes aside trolleys from the panels protecting all the exposed area.

White hard PVC, 50 mm high and 30 mm thick, safe to food contact.
With rounded shape, it meets conditions of all current hygiene standards.
In extremity, tip pieces assure a perfect finish.

It is fastened at the desired high on the partition wall. The fixing is invisible thanks to the section that is clipped after installation.
